Zomato Restaurant Analysis – Key Insights & Recommendations

Key Insights:

- Most restaurants are concentrated in the low to mid price range(500-1500).
- Ratings are mostly distributed between 3.5 and 4.5, indicating average to good service quality.
- Higher cost does not guarantee better ratings, showing price is not the only factor influencing customer satisfaction.
- Only a small number of restaurants receive very high votes, indicating limited high popularity concentration.
- Online ordering is widely available, showing strong adoption of digital services.
- Certain locations have a higher density of restaurants, indicating strong market demand in those areas

Interpretation:

- Customers prefer affordable restaurants with decent ratings.
- Competition is high in popular areas, requiring differentiation in service or quality.
- Customer engagement (votes) is concentrated among a few restaurants, suggesting brand or service influence.
- Digital presence (online ordering) plays a key role in customer accessibility

Recommendations:

- Focus on improving service quality rather than increasing pricing.
- Strengthen online presence to attract more customers.
- Promote highly rated restaurants to improve visibility.
- Explore expansion opportunities in high-demand locations.
- Enhance customer engagement strategies to increase votes and popularity.
